

Care Plan

What is a care plan?

A care plan, which may also be called a support plan, is a way of you and the council setting out what support you need to meet your eligible needs.

What should be included in a care plan?

All care plans should include:

- Your eligible needs
- Your personal budget
- What services might help to meet your needs
- Other information on reducing your eligible needs and any needs identified that aren't eligible for council support
